Montana

Differential Diagnosis of Oral Lesions - An Interactive Presentation using Audience Response Polling

For some practitioners, development of a working differential diagnosis is one of the most difficult tasks in the diagnostic sequence. This program is designed to increase skills of both dentists and hygienists to successfully formulate a differential diagnosis to either treat or to confidently refer.

This program is an excellent learning format for dentists and dental hygienists who together diagnose and plan treatment for their patients.

A great Lecture for the whole dental team!

Learning Objectives/Benefits from Attending:

A practical and useful review of the diagnostic terminology and sequence necessary to formulate a differential diagnosis.

Appreciate practical methodology to help refine clinical diagnoses.

Formulate differential diagnosis on soft tissue and radiographic lesions.

****Multiple clinical cases will be presented to enhance understanding and retention of material.**
