CREATING ENDODONTIC EXCELLENCE

Predictably successful endodontics is dependent on shaping canals, cleaning root canal systems, and three-dimensional obturation. Evidence-driven techniques will be presented to demonstrate each procedural step that comprises start-to-finish endodontics. Specifically, this lecture will address those factors that influence success, including pulpal breakdown, endodontic anatomy, access cavities, glide path management, working length, shaping strategies, active irrigation, and 3D obturation. Dr. Ruddle will focus on new instrument designs, irrigation fluid dynamics, and recent advancements for filling root canal systems.

Course Objectives:

At conclusion, participants should be able to:

- 1) Appreciate the role root canal system anatomy plays in treatment success.
- 2) Identify new files for negotiating and shaping canals.
- 3) Utilize 3D fluid dynamics and obturation methods.

SATURDAY, FEB 9, 2013

RUDDLE SHAPING & CLEANING WORKSHOP

This endodontic hands-on workshop is designed to move each clinician closer to their full potential. Participants will utilize a simple set of easy-to-use, progressively tapered ProTaper™ and WaveOne shaping files to prepare root canals for 3-D obturation. Clinicians will have the opportunity to confirm their preparation by fitting matching gutta percha master cones into these fully-shaped root canals. Every station will be equipped with the equipment and supplies necessary to participate fully. In addition, a digital xray system will be available for radiographic evaluation.

NOTE: Dr. Ruddle's all-day lecture is a prerequisite for this hands-on workshop and participants must bring 2-3 extracted teeth which have been previously accessed.

Satisfies RCDSO requirements for training in the administration of moderate sedation

Ontario AGD is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing dental education programs of this program provider are accepted by AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 06/01/2011 - 12/31/2014.

CLIFFORD J. RUDDLE, DDS, FACD, FICD

Brief Biographical Data

Dr. Clifford J. Ruddle is Founder and Director of Advanced Endodontics, an international educational source, in Santa Barbara, California. Additionally, he maintains teaching positions at various dental schools, is a Fellow in both the American and International Colleges of Dentistry, and has authored numerous articles and chapters for leading textbooks. As an inventor, Dr. Ruddle has designed and developed several instruments and devices that are widely

used internationally. He is best known for providing superb education through his lectures, instructional DVDs, and "ONE-ON-ONE" training courses in Santa Barbara, California.
