Practical Solutions for Complex Restorative Care
An Intense Two-Day, Hands-on Workshop
This program qualifies for the Master Track program of the Academy of General Dentistry

Presented by:
Arun Nayyar, DMD, MS
Gregori M. Kurtzman, DDS, MAGD, DICOI

Friday, Saturday, November 18, 19, 2011
8:00 am. to 5:30 pm.
Synopsis
This is a comprehensive review of clinical solutions for the practice of complex restorative dentistry. Come prepared to roll-up your sleeves and learn new treatment options, manipulate dozens of new materials and equipment, and understand changing treatment methodologies. Return to your office with hundreds of dollars worth of materials and discount coupons from leading dental companies.

Objectives
On completion of this workshop program, each participant will be able to treat patients with a new era of dental materials and clinical treatment options. Each technique is explained and then reinforced with hands-on participation.

Come Ready to Learn
- Diagnostic solutions to esthetics
- Comparison of new design and intensity of curing lights
- Appropriate uses of Emax, Zirconia, Cercon and Lava
- Rapid chairside solutions for provisional restorations
- Cement selection for ceramic veneers, crowns, implants
- Lasers and sulcus management
- Practical solutions to implants
- Guided surgery with cone beam technology
- Articulators and occlusion from a Lab perspective
- New materials and techniques for impressions
- Cost effective bonded resin buildup and fiber posts
- Diagnosing and treating TMD, snoring, and sleep apnea
- Mini implants and comfortable dentures
- Air abrasion systems
- Interim treatment crowns

Information
Date: Friday, Saturday, November 18 and 19, 2011
Schedule:
Friday
8:00 am. Registration
8:30 am. - 12:00 pm. Lecture
noon - 1:00 pm. Lunch
1:00 - 5:30 pm. Hands-on Workshop

Saturday
8:00 am. - 12:30 pm. Workshop
12:30 pm. - 1:30 pm. Lunch
1:30 pm. - 5:30 pm. Lecture

Location: University of Toronto Centre for Continuing Dental Education
1440 Don Mills Road.
Course Outline

Pre-treatment Diagnostics and Planning
Make pre-treatment mock-ups to diagnose treatment strategies and enable effective communication.

Understanding Adhesives
Learn Total-Etch vs Self-Etch, when to use one over the other material and how to provide better long term bonding results.

Tooth Prep Design for New Materials
Prepare quality preparations and instrumentation for a new generation of ceramic materials. Advanced margin designs for ceramic materials and CAD-CAM milled restorations.

Final and Diagnostic Impressions
Learn a new, highly successful impression technique. Learn to use a laser for sulcus dilation.

Provisional Treatment Restorations
Make accurate and quick matrix indexes. Use new provisional materials and burs for chairside finishing of single and multiple-unit restoration.

Cement Selection for Provisionals, Posts, Interim Crowns, implants, veneers and all ceramic crowns. Test various cements for final and provisional cementation.

Increase Treatment Acceptance in a Patient-Centered Practice
Adapt your presentations to known adult buying patterns. Use motivators to increase value for dental care.

Soft Tissue Management for Esthetics and Great Impressions
Management of soft tissue to maximize the esthetic results and sulcus troughing for better impressions. Learn to use a laser system.
Course Outline continued...

Anterior Guidance and its Crucial Role
Learn how to replicate anterior esthetics, incisal edge position and replicated with custom-made guide table and new articulators. Relationship of good restorations and proper articulator selection.

Core Buildup for Vital and Non-vital Teeth
Understand when to use or not to use posts. Work with a variety of post systems, cements and core buildup materials. Learn the importance of ferrule and why it's as important today as before.

Implant Systems for Improved Denture Retention
Place mini implants and learn to appreciate the superior fit of a complete or partial denture.

Posterior Direct Restorations
Learn how to achieve better proximal contact and anatomy, plus improve your bonding success.

Observe a CT Scan and See the Diagnostic Advantages

Make a TMJ appliance and bite guard and understand TMD pain management.

Air abrasion systems in a general practice, learn the advantages of intra oral use of air abrasion and their practical application.

Make a Chairside Single Appointment Composite Crown for patients with financial limitations.

Take Home a New Concept in Tooth Whitening and Delivery Systems

.... and much more!
Course Directors

**Arun Nayyar, DMD, MS** maintains a referral-based prosthodontic practice in Atlanta, Georgia. He is an internationally recognized speaker and has given over 250 presentations in the United States and internationally. He is a former faculty member of the MCG School of Dentistry where he served as director of fixed prosthodontics. He has also served as clinical director and adjunct principle research scientist at the Center for Dental Technology, Georgia Institute of Technology, Atlanta, Georgia.

**Gregori M. Kurtzman, DDS** is a full-time general practitioner in Silver Spring, MD. He has been recognized as one of the top 100 lecturers by Dentistry Today annually since 2006. Dr. Kurtzman has lectured extensively in the United States and internationally. He has authored over 200 dental articles on a wide variety of dental topics. He is a former assistant clinical professor at the University of Maryland, Baltimore College of Dental Surgery and a former assistant implant maxi-course program director.

Guest Faculty

**Mark Malterud, DDS** practices comprehensive minimally invasive dentistry in St. Paul, Minnesota. He is an adjunct faculty member of the University of Minnesota. Dr. Malterud is an invited speaker at local, national and international chapters of the Academy of General Dentistry and is Region 10 Trustee for the AGD. He will introduce a new composite crown for chairside fabrication and also lead discussions on TMD, NT I and mini implants.

**Ronald M. Baggott, CDT, MAAIP** is Product Manager for the Zimmer ERA Mini Implant System. Ron is a Certified Dental Technician and in 1995 received his Mastership from the Technology Section of the American Academy of Implant Prosthodontics. He teaches the use of mini implants to study groups in the US and International locations.

**Ekram Khan** is an information technology consultant specializing in the dental industry; he has written extensively on the topics of paperless workflow, digital radiography, ergonomic clinical computing, and practice management software. He has designed landmark software and imaging technologies. He will present strategies for cost effective implementation of digital imaging technology solutions for your practice.

**Rick King RDT** is a 1972 Graduate of George Brown College and earned his RDT certification the following year. Rick has extensive knowledge of All Ceramic restorations and the ever changing Cad Cam technologies and their use in fabrication all ceramic and implant supported prosthesis. He heads the Kingston office of the Shaw Group of Dental Laboratories. This workshop will provide detailed clinical information of laboratory expectations from the Dentist who prescribes these restorations.

**Kevin McAuley RDT** will discuss his expertise in implant prosthesis and implant systems, clinical techniques, suitable abutment selection, prosthesis design and fabrication. For the past 12 years he has been working for Nobel Biocare Solutions, Canada and is currently their Director of Marketing, Training and Education. Participants will learn advancements in Implant treatment planning using data from a cbct scan and new generation digital software.

Continued....
Jennifer C. McDonald is the managing partner of Dental Management Advisors. For over 20 years she has been providing management and technology solutions to more than 500 dental offices nationwide. She will share valuable information on practice success, current trends in patient expectation and income improvement.

Craig A. Pickett, RG, CDT, is NBC certified in Crown & Bridge with Technologist designation. He has over 30 years of C&B, Ceramics and Industry experience. At Whipmix he assists in developing and evaluating new products. He is very experienced in the clinical use of the new generation of dental articulators in general dentistry. He will discuss how their use can improve the quality of dental restorations.
