Free for AGD members

COURSE DESCRIPTION
After completing this course, participants will be familiar with the art of surgical and restorative dental implant cases. These steps include planning, surgery, uncovering, impression, provisionalization and final restorative placement. In addition they will learn how to gain patient acceptance for implant treatment and restorative treatment plans. Participants will be provided specialized instruction to ensure comprehensive understanding of the following topics:

- Diagnosis and treatment planning, digital radiology, and CT scans
- Treating single tooth, partially and fully edentulous, fixed and removable implant restorations
- Dental implant provisionalization; new materials & techniques
- Hands-on restorative workshop

FEATURED SPEAKER: DR. ERNEST CHOLAKIS
Dr. Ernest Cholakis obtained his DMD in 1982 from the University of Manitoba and his MBA in 2002 from the University of Chicago Graduate School of Business. He then attended the Misch Institute program in Implant dentistry at the University of Pittsburgh. Dr. Cholakis received his fellowship in the International College of Oral Implantology in 1996. Since that time Dr Cholakis has placed and restored thousands of dental implants. In the last two years he has mentored over 45 dentists in placing their first implant. Academically Dr Ernest Cholakis is an Assistant Professor and Co-Director of Dental Practice Management Studies. He is a recipient of Her Majesty’s Golden Jubilee Medal for his contributions to the dental profession and his community.
