

Fall MasterTrack Program

October 3rd-5th, 2014

ProTech Dental Studios, Reston VA

Thomas W. Nabors, DDS, FACD

“Empowering Dentists and Dental Teams In the New Millennium; Understand our Role in Health Care”

Friday, October 3rd; 8:00 AM to 5:00 PM

Basic Science – Course Code 010, 8 Credits

To establish an urgent message: The Need is already there. And, the GP practice has a unique and exciting role in both oral and general health care.

To present the evidence: evidence that supports the role of specific periodontal and peri-implant infections relative to systemic diseases such as heart attack and stroke.

To present a “Personalized” Diagnostic and Clinical protocol: utilizing new DNA diagnostic testing along with specific treatment & maintenance protocols.

To present a potential financial model: One that will grow the general practice in both measureable & immeasurable ways.

Ronald P Morris, DDS

“Everything You Wanted to Know About Oral Surgery, but Were Afraid to Ask”

Saturday, October 4th 8:00 AM to 5:00 PM

Sunday, October 5th 8:00 AM to 5:00 PM

Anesthesia and Pain Control (Course Code 350, 1 Credit Hour), Oral Surgery (Course Code 310, 15 Credit hours)

This course will utilize some specially designed models that I feel reproduce the feel of real tissue, bone and teeth like I had never used before. We will cover a variety of surgical cases from extraction of a mandibular first molar and placement of the new ultra wide diameter implant, extraction of a Maxillary first molar, trans-alveolar sinus lift and immediate placement of the ultra wide diameter implant, extraction of tooth #8, with an immediate implant, immediate abutment, temporary tooth and graft. We will also cover soft tissue procedures of second stage uncovering and reconstruction of the interdental papilla on a molar with the new Contour plastic healing abutments, and a palatal roll soft tissue reconstruction in the esthetic zone. In addition to the model surgery, you will be shown related live surgical videos demonstrating these techniques.

Learning objectives:

- Understand new skills and instruments for extraction and immediate implant placement with preservation of hard and soft tissue.
- Review oral surgery anatomy and local anesthesia techniques.
- Practice hard and soft tissue procedures on life like models.
