

AzAGD Presents:

Chemical Dependency-OSHA-and Infection Control

Course Description:

This presentation concentrates on the Centers for Disease Control and Prevention (CDC) Guidelines for Infection Control in Dental Health-Care Settings—2003. Attendees will learn what they should be doing to ensure a safe working environment for themselves and their patients. The evening portion will be reviewing the new street drugs affecting our area and possibly our own practices. You will be able to earn all required CE hours for licensure renewal in these specific areas at one time. This means less time away from your practice and home.

Course Objectives:

At the completion of this presentation the attendee will be able to

- Describe prevention strategies for occupational exposures.
- Discuss the need for prompt medical evaluation following an occupational exposure incident.
- Describe hand hygiene, sterilization, and disinfection procedures.
- Describe current approaches intended to improve the quality of water used for dental treatment.
- Discuss special infection control considerations including dental infection-control program evaluation and management.

Speakers:

Col. Jennifer Harte is the Military Consultant to the Air Force Surgeon General for Dental Infection Control and Director of Professional Services at the USAF Dental Evaluation. She provides guidance in dental infection control and occupational safety/health to over 900 federal dental service facilities. She was in private practice before beginning her career with the USAF. Dr. Harte is a Diplomate of the American Board of General Dentistry. Dr. Harte has been responsible for the direct oversight of dental and medical infection control programs in military health-care clinical settings for over 16 years.

Mr. Hal Nevitt is currently the Director of the Member Assistance Program for the Arizona State Bar. His resume includes State licensure as a Social Worker and Independent Substance Abuse Counselor. Mr. Nevitt has extensive presentation/training experience with over Twenty years of experience counseling with adolescents, families, and dually diagnosed adults. His is know also for his superb motivatioal speaking. We are thrilled to have him presenting the Chemical Dependency portion of the course.
