Tips and Tricks for Everyday Implant Dentistry

COURSE OUTLINE

This comprehensive lecture provides practical, evidence-based guidance on the diagnosis, treatment planning, surgical placement, restoration, and maintenance of dental implants. Participants will explore treatment options for single-tooth, partial, and full-arch edentulous cases, with a focus on predictable outcomes and sound clinical decision-making.

Topics include extraction and socket preservation protocols, biomaterial selection, implant treatment planning, surgical techniques, guided bone regeneration, soft tissue grafting, sinus augmentation, and management of complex cases. The course also covers restorative considerations, laboratory communication, implant maintenance, and the prevention and management of complications.

Through clinical cases and practical treatment pearls, attendees will gain actionable strategies that can be immediately applied in everyday practice.

Objectives:

- Assess treatment options for single-tooth, partial, and full-arch edentulous cases.
- Develop implant treatment plans using sound case selection principles. Apply extraction, socket grafting, and ridge preservation techniques to support implant success.
- Select appropriate biomaterials and regenerative procedures, including bone and soft tissue grafting.
- Implement predictable surgical protocols and sinus augmentation when indicated.
- Choose implant systems and restorative solutions based on individual patient needs.
- Enhance collaboration with dental laboratories for optimal restorative outcomes.
- Establish maintenance protocols and manage common implant complications for long-term success.

Dr. Joshua Shieh, BDS, MDS is a board-certified general dentist in Canada and a certified specialist in Periodontology and Oral Implantology with 18 years of experience in implant dentistry. He is a Diplomate of the American Board of Oral Implantology (ABOI), a Fellow of the ICOI and AGD, and a Faculty Member with Hiossen Implant Canada | AIC Education. A former instructor at the University of Toronto, Dr. Shieh is an international lecturer, published author, and annual contributor to Oral Health Journal.
