He hosts a weekly podcast, *Delusional: Winning the Weekly War of Dentistry*. Dr Snyder is also a professional race car driver and entrepreneur. He practices Cosmetic and Restorative dentistry in both Laguna Niguel, CA and Las Vegas, NV.

## Mastering Skills with Anterior Composites: Streamlined Techniques for Beautiful Smiles

### *Lecture And Hands On*

Let's be honest — composite bonding is one of the most intricate and demanding procedures a dentist can perform. It requires precision, time, and a high level of skill. But when done right, the results are incredibly rewarding, both for the patient and the dentist. The ability to transform a patient's smile, boost their confidence, and give them genuine happiness is unmatched. And for those who master this art, the financial rewards can be equally fulfilling as patients seek you out for your expertise in creating stunning, natural-looking smiles.

This course was designed to provide you with proven techniques and tips to simplify the complex and time-consuming

process of restoring anterior teeth with composite resins. We'll cover cutting-edge strategies and materials that allow you to perform anterior composite bonding, veneers, and restorations more efficiently, saving time while enhancing the quality of your results. By the end, you'll have the skills to streamline these procedures and deliver beautiful, lasting smiles with confidence.

## Course Objectives

- 1) Injection molding composite veneers for cosmetics
- 2) Class IV composites and how to get a good contact
- 3) Adhesion techniques to create longevity
- 4) Matrix systems to help in creating ideal contours and contracts with class II restorations
