**Dr. Carla Cohn, DMD**

Dr. Cohn is a general dentist, devoted solely to the practice of dentistry for children. She maintains private practice at Kids Sleep Dentistry Winnipeg at Western Surgery Centre in Winnipeg, Canada. She has recently founded a unique continuing dental education company, Lit Smile Academy. Dr. Cohn has published several articles, and hundreds of webinars and live courses. She enjoys teaching all aspects of children's dentistry for the general practitioner and has had the pleasure of doing so both nationally and internationally. She teaches in the clinical undergraduate pediatric program at her alma mater University of Manitoba Gerald Niznick College of Dentistry. Dr. Cohn is proud to be an active member of several dental organizations and societies and has served as president of Manitoba Dental Association. She has been invited as a fellow to Pierre Fauchard Academy and International College of Dentists and has been recognized as Dentistry Today's Leader in Continuing Education multiple years in a row as well as Top 100 Docs.

**Keep The Kids IN  
Your Practice**

**Lecture And Hands On**

As a general practitioner, you should be able to confidently care for most of the kids in your practice—without referring them out to the pediatric dentist across town. Treating children should be enjoyable and stress-free for both you and your young patients. This course will provide you with the latest evidence-based methods and techniques for intra-coronal restorations, minimally invasive dentistry, the Hall Technique, primary dentition full-coverage restorations, pulpotomies, and more.

Learn practical strategies for communicating with children to gain their trust, manage their behavior, and ensure positive experiences. Step-by-step guidance will be provided to help you master pediatric procedures and become a superstar with both kids and parents in your practice.

As Benjamin Franklin said, "Tell me and I forget, teach me and I may remember, involve me and I learn." In this course, you will be involved.

You've heard it before—treat your kids well, and your practice will soar!

**Course Objectives**

1. Master efficient, reliable pediatric techniques for treating primary dentition.
2. Learn practical, kid-friendly communication strategies to reduce anxiety and improve cooperation.
3. Implement minimally invasive dentistry approaches, including the Hall Technique.
4. Effectively treat anterior and posterior primary dentition decay.
5. Successfully diagnose and manage pulpally involved teeth using the latest materials and techniques.
6. Learn how to size and seat stainless steel crowns.
