“The Program”: Minimally Invasive Dentistry as It Relates to All Specialties

COURSE OUTLINE

Minimally invasive dentistry is not just about small beautiful fillings. This program will cover MID as it relates to all aspects of Dentistry. **WARNING!** This course will energize you and change the way you practice forever.

Learning Objectives:

- Cariology and the new philosophy
- Ok, operative dentistry: How can we not cover it?
- Silver fluoride: Why this may be the hottest thing to hit dentistry in years
- Minimally invasive periodontics: Treat more, refer less, and achieve outstanding results
- Bone grafts that stay in place and actually work
- Cements, bonding agents, and everything else you need in the arsenal
- Tooth whitening: Introducing it for even the difficult cases

Dr. Ron Kaminer is a 1990 SUNY Buffalo School of Dental Medicine graduate. Dr. Kaminer has always been passionate about technology and was one of the first 100 Dentists in the country to include a hard tissue dental laser in his practice.

Over the years Dr. Kaminer has taught thousands of Dentists worldwide about dental lasers, technology, and minimally invasive dentistry. He sits on the Board of Catapult Education, is a frequent contributor to Mentor magazine, sits on the editorial board of Dental Product Shopper, and acts as a clinical consultant to numerous dental manufacturers.

While doing all of the above, Dr. Kaminer practices full-time in both his Hewlett and Oceanside NY offices, focusing on minimally invasive and digital dentistry. He is a Fellow of The Academy of General Dentistry, a member of the American Dental Association, and a member of The Academy of Laser Dentistry.
