Advanced Implant Training Course
Feb 22-23, Apr 19-20, Jun 28-29, 2013
Course Director: Dr. Mark Lin

Course Outline *
Session 1: Advanced Implant Treatment Planning and Complex Case Selection, Feb 22-23, 2013
(Model hands on exercises)

Session 2: Advanced Implant Surgical Parameters, Apr 19-20, 2013
(Live patient demonstrations, Hands on exercises on pig jaws)

(Live Patient Procedures)

Pre-requisites
Due to the advanced nature of this course, all course participants must be experienced in implantology with the following minimum requirements:

a) Surgically placed over 100 dental implants
b) Prosthetically restored over 100 dental implants (fixed & removable)
c) Some level of exposure on various grafting options

Testimonials

“This residency is well organized and the instructors are excellent! Mark goes above and beyond to make sure you succeed in your implant placement career by offering his mentorship and support well beyond the timeline of the residency. I’ve learned so much in this course and can’t thank you enough. I’ve also made some good friends along the way. I highly recommend this course to anyone starting or looking to further their implant placement career!” - Dr. Anna Fong - Toronto, ON

“Dr. Lin packaged and presented info concisely and extremely well. I got way more from these two days than I would have thought. I will use this stuff. Thanks!” – Dr. Nicholas Rodo, Orchard Park, NY

“I’m so happy that I made this investment! "A brain once stretched never goes back to its original dimension. Dr. Lin really does train your brain. This course has given me the tools and the confidence to treatment plan and start placing implants on my patients. More importantly it has trained me to be a more critical thinker and a better clinician”.

*Please contact your local representative for detailed course outline.
Session 1  Advanced Implant Treatment Planning And Complex Case Selection, Feb 22-23, 2013

- Advanced diagnostic requirements for complex cases
- Concept of computer guided treatment planning, implant surgery and prosthetics
- Implant selection criteria for various specific indications (Use of narrow and short dental implants)
- Advanced anterior implant esthetics (Single and multiple)
- Extraction and immediate implant placement
- Immediate provisionalization options for dental implants
- Concepts and requirements of immediate loading
- Full mouth reconstruction treatment planning and sequencing of treatment
- Fixed and removable implant prosthetic concepts
- Implant protected occlusal schemes for single, quadrant and full mouth reconstructions
- Various occlusal concepts for complex full mouth reconstructions
- Management of parafunctional habits with dental implants
- Case work up requirements for live patient session # 3

Session 2  Advanced Implant Surgical Parameters, Apr 19-20, 2013

- Pre-surgical work up and medical evaluation for the implant patient
- Pharmacology and drug interactions for implant surgery
- Anatomy review and danger zones pertinent to implant surgery
- Periodontal soft tissue considerations and grafting for implant surgery
- Surgical pearls to optimize implant integration success
- Flap versus flapless protocols
- Guided bone regeneration concepts with various types of graft material
- Indications for use of autografts, xenografts, allografts, and alloplasts
- Advanced block grafting and autogenous harvesting options
- Safe indirect sinus grafting with CAS-kit
- Direct sinus grafting with LAS-kit
- Sinus grafting surgery complications
- Complications in implant dentistry
- Live patient demonstration for implant surgery
- Model base simulated implant placements
- Hands on pig jaw exercises for flap designs, osteotomy preparations and suturing techniques
- Case work up for live patient cases for session # 3

Session 3  Live Patient Implant Surgical Placements, Apr 26 - 27, 2013

Each course participant will have an opportunity to place single or multiple dental implants on various cases on their own patients or patients will be provided accordingly. Advanced surgical concepts will be applied to clinical cases reviewed in this course. Various advanced prosthetic reconstructions with live patient cases will be demonstrated and reviewed.
Dr. Mark Hsiang En Lin
B.Sc., D.D.S., M.Sc. (Prosthodontics), F.R.C.D. (C)
Assistant Professor, Prosthodontics, University of Toronto

Dr. Mark H.E. Lin graduated from the University Of Toronto in the Biochemistry Specialists honors program. He received his dental degree from University of Detroit Mercy in which he was on the Dean’s list for 4 consecutive years and finished within the top 5% of the class. He then completed a 1-year General Practice Residency program at the Miami Valley Hospital in Dayton Ohio, where he received his Intravenous and advanced surgical training.

He practiced general dentistry for 13 years then completed his post graduate training in the specialty of Prosthodontics at the University Of Toronto. Immediately after graduation for the specialty program he served as an associate in dentistry as a surgical demonstrator in the post graduate Periodontics discipline and staff at the Implant Prosthodontic Unit (IPU) in the graduate Prosthodontics discipline at the University Of Toronto. He currently holds the title as “Assistant Professor” at the faculty of dentistry, discipline of Prosthodontics at the University of Toronto.

He conducted clinical research on the topic of “Advanced Anterior Implant Aesthetics” for his Master of Science thesis. He is also a co-investigator for two additional ongoing scientific studies at the Faculty of Dentistry Prosthodontics discipline. In addition, he maintains a full time specialty practice as a Prosthodontist at Dr. Mark Lin Prosthodontic Center with focus on full mouth reconstructions, dental implant surgery and implant prosthetics.

He is a Fellow and Diplomate with the International Congress of Oral Implantologists (I.C.O.I.). He is an Associate fellow and Fellow with the American Academy of Implant Dentistry (A.A.I.D.) He is also a graduate and Fellow with the Misch Implant Institute. Finally, he is a Diplomate with the American Board of Oral Implantology/Implant Dentistry (A.B.O.I.), a designation that is earned by less than 40 dentists or specialists in Canada. He is a Fellow and serves as an Examiner with the Royal College of Dentists of Canada in the specialty of Prosthodontics.

Dr. Lin has given numerous lectures, presentations and courses on the topics of Implant Dentistry (Surgical/Prosthetics) with live surgical and prothetic demonstrations, anterior implant esthetics, implant complications and Practice Management. Over the past 10 years, he has given more than 200 lectures at various different professional and scientific meetings in Canada, U.S., Taiwan, Germany, India, Iran and China.

REGISTRATION / CANCELLATION / CE CREDITS

Course attendance limited to ensure maximum learning experience during the hands-on and clinical portions, and registration is accepted on a first come, first served basis. Full tuition payment must accompany all registration forms. Upon receipt of this registration form and tuition fee, Hiossen will send you written confirmation. For Course payment in full due by February 1, 2013. Early registration tuition fee applies if payment received prior to January 15, 2013. Confirmed registrants who are unable to attend the course can obtain a refund by notifying Hiossen in writing no later than 30 days prior to the course date. Cancellations past that date will be subject to an administrative fee of 10% of tuition paid. Hiossen reserves the right to cancel a course no later than 30 days prior to the course date. Please be aware that Hiossen is not responsible for reimbursement of a non-refundable airline ticket or any other travel expenses in the event that a course is canceled. Continuing education credits awarded in the United States and in Canada for participation in the CE activity may not apply toward license renewal in all states, countries or provinces. It is the responsibility of each participant to verify the requirements of their state, country or province.
