Welcome to BITES Institute: www.bitesinstitute.com

We have been serving Doctors since 2005. Our goal is to provide continuing education to help Doctors obtain their goals in Implant dentistry. Bites Institute is a dedicated teaching centre focusing on all aspects of Implant dentistry. Whether your passion is surgical or prosthetic side of the discipline, we always have appropriate levels of courses to fulfill the needs of individual participants. Participants will enjoy the continued support from our Institute even after the program ends, by enrolling in our various Implant related study clubs where we continuously help the doctors to improve their clinical skills. We also encourage our doctors to take advantage of on-line membership programs which will give you access to numerous clinical Implant videos, on-line study clubs and courses as well as on-line Forum section where you can keep in touch and discuss all aspects of Implant dentistry with other members and mentors.

Testimonial
“BITES soft tissue course is one the best hands on courses I have taken. It simplifies periodontal surgery into simple steps that make the procedures easy to learn and predictable. After taking this course I was able to immediately implement the procedures in my private practice” Dr. Jessey Minhas   Kelowna, BC
