

BOTOX & PHOTOGRAPHY FOR DENTISTS

Theory & Hands-On Live Models

Course Outline

More and more dentists show a high demand in administering neurotoxins as part of their dental procedures. This comprehensive course is designed for beginners and advanced dentists who are ready and comfortable to add neurotoxins to their practice immediately after completing this course. During the course, we will cover indications of neurotoxin in the face area and you can use your training based on the RCDSO regulations and guidelines.

Dental photography is a key element in proper documentation and good case presentations. Dr. David Goldshaw will review the special techniques for capturing the ideal photos to increase case acceptance during treatment planning, using the Shofu dental camera.

Botulinum Toxin

- Introduction to neurotoxins
- Facial anatomy relevant to perioral area
- Types of available neurotoxins in Canada
- Pharmacology and physiology of neurotoxins
- Application and indications for neurotoxins in dentistry (TMJ disorders including myofascial and arthrogenic disorders, bruxism, trismus, masseter and temporalis hyperactivity, headaches, sialorrhea and salivary secretory disorders, facial nerve palsy, facial pain and trigeminal neuralgia, etc.)
- Contraindications
- Side effects
- Management of complications

Photography

- Explain the first disinfectable camera (Shofu Eye Special C-IV) for dental treatment planning and proper case presentation
- Learn the 9 uses of this special camera from face, standard, surgery, mirror, low-glare, whitening, tele-macro, video and isolate-shade
- Using a Wi-Fi card, easily transfer images to your computer, laptop or iPad

About Dr. Tarek Chbat

Dr. Tarek Chbat is a fellow of the Royal College of Physicians of Canada and the College of Physicians and Surgeons of Ontario. He graduated from the University of Ottawa medical school in 2011 and the University of Toronto anesthesia residency program in 2016. He followed up by doing a chronic pain fellowship at St. Michael hospital in Toronto. He got his facial aesthetics training in 2013 in Toronto and has been practicing for 8 years using modalities that include neurotoxins, dermal fillers, threads, and PRP.

About Dr. David Goldshaw

Dr. David Goldshaw graduated from Eastman Dental Hospital in London UK, with a degree in dentistry and specialized in dental materials. He then decided to advance his education and choose oral surgery as his specialty.

Dr. Goldshaw is an experienced educator and previously worked in research and development, curator of dental museum, and traveled most of the world reaching dental communities throughout.
