

CROWN LENGTHENING & PERIODONTAL FLAP SURGERY

SEMINAR/HANDS-ON WORKSHOP

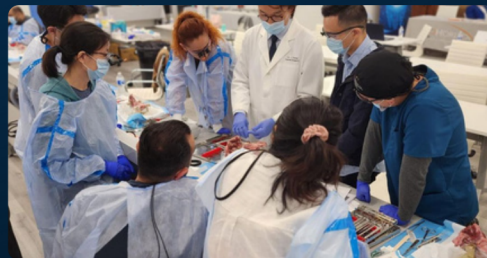

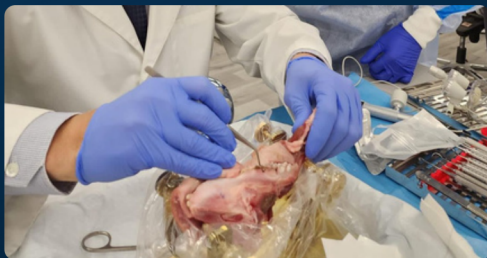

Periodontal flap surgery employing full-thickness mucoperiosteal flaps provides opportunities for the clinician to perform a variety of treatment approaches for periodontal problems. Crown lengthening surgery with, or without osseous recontouring to prepare crown margins & make a final impression should be included in the surgical options of the restorative dentist.

COURSE OBJECTIVES:

- Diagnose periodontal and restorative conditions requiring periodontal flap surgery
- Know the principles of flap design including mucoperiosteal flaps
- Know crown lengthening surgery principles and rationale
- Know periodontal flap surgery including osseous recontouring and flap management
- Know post-operative care and provide post-operative instructions

HANDS-ON SESSION (WITH PIG JAW)

- How to perform incisions, flap elevation, flap positioning & osseous reduction
- Flap procedures for access to osseous defects, recontouring & reduction
- Crown lengthening & suturing techniques

COURSE TUITION FEE: ~~\$1,095.00 + HST~~

EARLY BIRD PRICE: \$995.00 + HST

EARLY BIRD DISCOUNT OF \$100 UNTIL APRIL 24, 2024
