Morning Course: TMD Essentials for the GP

COURSE OUTLINE

Temporomandibular disorders are not a single condition disease—they are a cluster of muscle, joint, and behavioral problems that present as pain, noise, limited opening, and bite complaints. This session takes a fresh, practical look at the various presentations and nuances of TMD in dental practice, how to sort muscle from joint and nerve at the chair side, and which tests and treatments truly change outcomes. This evidence-based presentation will examine reversible therapies, appliance choices, and red-flag situations.

Afternoon Course: Oral Surgery Tips & Tricks

COURSE OUTLINE

Office oral surgical procedures need not be stressful or intimidating. This presentation will focus on practical stepwise approaches to suturing, complicated extractions, roots, wisdom teeth and grafting. Case selection and instrumentation will be emphasized. You will learn evidence-based management strategies for common complications and sequelae which will give you new confidence in treating surgical patients.

Dr. Freund received his MD from McMaster University with his DDS and specialty training from University of Toronto. He practices as an Oral and Maxillofacial surgeon at the Chrysalis Dental Centre in Toronto. His clinical interests are immediately loaded implant rehabilitation, neuromuscular dysfunction of the head and neck and minimally invasive facial rejuvenation. He was previously an examiner for the College of Physicians and Surgeons of Ontario, the Royal College of Dentists of Canada and a clinical instructor at the University Of Toronto Faculty Of Dentistry. His areas of research are focused on validating protocols in immediate implant placement. He has lectured extensively nationally and internationally as well as authored numerous scientific papers. Podcast host "The Wellness Dentist".
