Be Your Own Prosthodontist: Keep Big Cases in House

COURSE OUTLINE

We face difficult cases everyday in our offices. We must determine where we “want to go” and how to reach that goal. A long-time Academy leader shares the tips and pathway to becoming the dentist you always dreamed you would be. Gain confidence today as we review multiple cases.

Learning Objectives:

- Learn a systematic way to simplify and treat ANY case
- How to phase cases for any budget with injection molding
- How to determine which indirect material to use for each case.
- When to use deprogrammers as a diagnostic and therapeutic tool
- How to attract more cosmetic patients and get your staff excited to encourage them
- Appropriate uses for today’s new Zirconias and brand-new cements
- Bioactive/Biomimetic Dentistry: The Time is NOW!
- How to take charge of your dental world- eliminate the negative and add what makes you smile
- 30 better, brand-new, more economical products to use on Monday morning
- Learn about the latest esthetic zirconias...what are 3y/4Ys and 3Y/5Ys? When to use each
- Cementation 2023: Learn why it’s time to throw out ALL pre-pandemic cements and get newer, better ones
- Learn why it’s time to adapt AI dentistry in every office- yes, NOW!
- Why most of us left dental schools with “dental imposter syndrome- and how to triumph over it

Dr. Peter Auster is an interactive speaker that combines the latest technology & techniques to customize a hands-on experience for his audiences. His 30+ years in private practice specializing in cosmetic + restorative dentistry brings a wealth of knowledge that has been quoted in Women’s Health, Ok!, Glam Bellezza, and Natural Health magazines.

His article, “Groundbreaking Composite Dentistry” was the cover story of Dentistry Today Magazine in February 2019.
