

2 Day Hands-On Mastertrack

MARKHAM MARCH 10-11 AND OCTOBER 20-21 2023 FRIDAY AND SATURDAY

DR. ROBERT CONVISSAR, D.D.S., F.A.G.D.

Dr. Robert Convisar is a pioneer in the field of laser dentistry. One of the first dentists in the world to incorporate lasers into general practice he has over 32 years of experience with CO2, Diode, Erbium, and Nd:YAG wavelengths. He has authored over fifteen peer-reviewed papers and 7 laser textbooks. An international lecturer from New York to London to Sydney to Tokyo to Dubai, and everywhere in between, he has delivered close to 400 Laser Certification and Laser Tongue Tie Certification courses worldwide. He practices laser-assisted dentistry in New York City. He is the only dentist in the world to have the triad of awards:

- Diplomate of the American Board of Laser Surgery
- Fellow of the American Society of Laser Medicine and Surgery
- Master of the Academy of Laser Dentistry

As well as being a Fellow of the Academy of General Dentistry His seminal textbook Principles and Practice of Laser Dentistry, now in its 2nd edition, has been the standard textbook on laser dentistry for over a decade – translated into Spanish, Portuguese, Russian, and Chinese, with more editions pending. He is the co-author of Color Atlas of Tongue Tie and Lip Tie Laser Frenectomy – the first textbook in the world on the subject.

Terms & Conditions

The Ontario Academy of General Dentistry reserves the right to cancel any mastertrack course at any time. In such cases a full refund will be given to each participant. Participants cancelling more than 90 days prior to the course will be refunded in full. Participants cancelling less than 90 days but more than 30 days prior to the course are entitled to a refund less a \$300.00 Administration fee. Participants who cancel less than 30 days prior to the course are not entitled to a refund. Costs incurred for travel and hotel accommodations remain the responsibility of each participant.

Ontario Academy of General Dentistry (Approval #219289)
Academy of General Dentistry Approved PACE Program Provider. FAGD/
MAGD Credit. Approval does not imply acceptance by a state or provincial
board of dentistry or AGD endorsement. 01/01/2010 - 12/31/2025

PARTICIPATION COURSE IN LASER DENTISTRY - AN AMERICAN BOARD OF LASER DENTISTRY CERTIFICATION COURSE

REGISTRATION: 8:00AM – 8:30AM | COURSE: 8:30AM – 4:00PM

Candidates who successfully complete this course will receive a Certificate in Laser Dentistry recognized by the American Board of Laser Surgery, the only Medical Certifying Board in the world dedicated to Lasers and Light Energy in Medicine and Dentistry.

Has the excitement surrounding the introduction of lasers to dentistry been more smoke than substance? Since 1990, the U.S. Food and Drug Administration has approved the use of TWELVE different wavelengths for dental use. These different wavelengths create a world of difference in how the lasers operate, and their usefulness in the oral cavity. The use of lasers for specific procedures found in everyday general practice will be highlighted. The first day will detail laser use in the following subject matters:

- 1) Non-Surgical, Surgical and Regenerative Periodontal Therapy
- 2) Surgical and Restorative Implantology
- 3) Fixed and Removable Prosthetics
- 4) Oral Medicine/Oral Surgery/Oral Pathology
- 5) Pediatric and Adolescent Operative Dentistry
- 6) Endodontics
- 7) Pedodontics/Orthodontics
- 8) Esthetic/Cosmetic Dentistry
- 9) Practice Management/Marketing

The second day workshop will give each participant hands-on experience with the various wavelengths, performing surgical procedures on in-vitro models (animal mandibles). Real time videos of routine laser procedures will be part of the in-depth discussion of specific instrument settings and techniques for laser surgical procedures.

Attendees are expected to perform the following procedures on the models:

Gingivectomy	Initial Periodontal Pocket therapy
Biopsy	Aphthous Ulcer Treatment
Frenectomy	Flap Procedure
Crown Lengthening	Deepithelialization
And more.....	

At the conclusion of the course, the participant:

- Will be familiar with the various wavelengths used in dentistry today
- Will understand their effects on oral tissues
- Will understand their uses for specific oral diseases and pathologies found in everyday practice.
- Will be able to incorporate this knowledge into a basis for determining which laser wavelength is most appropriate for their practice
- Be able to incorporate hard and soft tissue laser dentistry into their practices first thing tomorrow morning.
