

PRESENTED BY: Fred S. Margolis, D.D.S., F.I.C.D., F.A.C.D., F.A.D.I., M.A.L.D.

UPDATE IN PEDIATRIC DENTISTRY

BEHAVIOR MODIFICATION TECHNIQUES FOR THE PEDIATRIC DENTAL PATIENT

Utilizing slides, real-life anecdotes, and videotapes the participant will learn how to utilize various techniques to teach the patient that dentistry does not have to be fearful and can even be fun! The welcome letter and a computer-generated personalized book about going to the dentist are great beginnings for the first time patients. When to have parents in the operatory and how to utilize familiar objects will be illustrated. How to assess the child's potential behavior will be taught. Radiographic techniques for children will be covered. Vocal intonation, mouthprops, body wraps, and rubber dam techniques will be reviewed. Various techniques for giving "painless" injections will be illustrated. Both pharmacologic and non-pharmacologic techniques will be discussed, including nitrous oxide sedation.

TRAUMATIC INJURIES OF THE PRIMARY AND PERMANENT DENTITION

Using patient's photos, radiographs, and case histories, various types of traumatic injuries and their treatment will be reviewed. Invulsions, dislocations, avulsions and the Ellis Classification of traumatic injuries will be discussed. Various radiographic techniques for hard and soft tissue injuries will be illustrated. The protocol for reimplantation of permanent incisors, including various splinting mechanisms will be covered. The dark primary incisor and treatment of trauma to primary teeth will be discussed. Pulp therapies of traumatically injured teeth will also be reviewed.

SPACE MAINTAINERS MADE SIMPLE

In this course the participant will learn the rationale behind the use of space maintainers. The participant will learn how to diagnose, the proper selection and fabrication of space maintainers. Proper space maintenance will be taught in a step-by-step approach so that the participant will be able to utilize the practical knowledge. Utilizing slides, models, and videotapes, the participant will learn how to diagnose, treat, prescribe to the laboratory, and utilize both removable and fixed space maintainer appliances.

Dr. Fred Margolis received his B.S. and D.D.S. from The Ohio State University and his certificate in pediatric dentistry from the University of Illinois College of Dentistry. Dr. Margolis is a Clinical Instructor at Loyola University's Oral Health Center and an adjunct clinical assistant professor at the University of Illinois College of Dentistry. He has lectured for over 30 years and is an internationally recognized speaker on pediatric dentistry, laser dentistry and dentistry for the disabled patient.

Dr. Margolis has had articles published in both lay and professional journals. The subjects include pediatric dentistry, dentistry for the disabled, and laser dentistry.

Fred has written a course manual "Beautiful Smiles for Special People" and is the co-author of the book Pediatric Laser Dentistry: A User's Manual, Quintessence, 2011.

He has been a Seminar Series Lecturer for the American Dental Association and has recently been selected as a "top CE lecturer for 2012" by Dentistry Today. He is proud of the recognition awarded to him by the Illinois State Dental Society as the "Distinguished Member of 2005", the Humanitarian Award from AGD in 2011 and the Meritorious Service Award by Alpha Omega International Dental Fraternity in 2011.

He is in full-time private practice of pediatric dentistry in Buffalo Grove, Illinois.
