

# DIGITAL SMILE DESIGN with Dr.Christian Coachman in TORONTO!

Digital Smile Design (DSD) has been used for over 8 years by top Dentists and Dental Technicians to improve the quality of esthetic dental treatments leading to precise results.

DSD is based on the analysis of the patients facial and dental proportions using todays technology to understand the relationship between teeth, gums, lips, smile and emotional dentistry.

# PROGRESSIVE ORTHODONTIC SEMINARS

Improve Your Patient Care With  
THE WORLD'S #1

## ORTHODONTICS CE Program

**FREE** Intro to Ortho Seminars across Canada

April 28, 2018 VANCOUVER

May 5, 2018 WINNIPEG

June 9, 2018 TORONTO

**New Seminars starting in 2018  
- REGISTER TODAY!**

## TOP REASONS GPs LEARN COMPREHENSIVE ORTHODONTICS

### 1 IMPROVE CARE

Most dentists view comprehensive orthodontic education as essential to increase their professional knowledge, skills, and care. Better understanding tooth movement and malocclusion not only improves your ability to evaluate orthodontic cases, but transforms how you see all of your cases.

### 2 BOOST PROFITS

The national average fee for orthodontics is over \$4500. Providing orthodontics to your clients can dramatically increase your practice revenue, with no additional marketing costs. As a student, it is common to add over \$90,000 of income to your practice while you are still in the program.

### 3 MEET PATIENT DEMAND

About half the doctors that choose to learn comprehensive orthodontics say that their patients requested them provide this needed service.

Use a comprehensive orthodontic system to transform your care and add **\$120,000 CAD** in income
