## New Products Update: When Do I Make the Switch?

### COURSE OUTLINE

Dentists are inundated with new and improved products from manufacturers on a regular basis. Some are truly fantastic while others seem merely to be a marketing ploy. The question is, "how do I decide what products to incorporate into my daily practice? Will they make my life less stressful and more productive?" Dr. Gillespie will review several products from the latest in universal bonding agents, bulk fill composites, anterior layering techniques, cements, and all ceramic systems. Attendees will leave feeling more educated about the latest products to hit the market and confident in their ability to choose which ones will help their practices continue to grow.

### COURSE OBJECTIVES

- Properly utilize different types of bonding agents for any procedure of direct or indirect dentistry.
- Determine the advantages and disadvantages of bulk fill resins for direct restorations.
- Select and properly use cements for each ceramic system including resin cements, RMGI and bioceramic cements
- Overview of the latest in Nano-hybrid composite systems and anterior layering placement

Dr. Greg Gillespie received his dental degree from the University of Washington School of Dentistry and maintains a full time practice in Vancouver, WA focusing on general dentistry with an emphasis on implant and cosmetic dentistry. His vision of comprehensive dentistry focuses on effective treatment planning and utilizing the best dental materials available. Dr. Gillespie lectures nationally and is involved in ongoing evaluations of the latest materials and techniques in dentistry.
