“Live Patient Clinical Demonstration” AGD 2019-2020

COURSE OUTLINE

- a) Maxillary Anterior Immediate extraction with implant placement using a computer guided approach and immediate temporization
- b) Closed tray versus open tray impressions for master cast fabrication in implant prosthodontics
- c) Cement versus screw retained implant prosthetics
- d) Implant occlusion for single posterior, single anterior, multiple quadrant fixed restorations
- e) Mandibular implant over denture treatment options utilizing individual Locator attachments
- f) Insertion and adjustment requirements for night guard appliance to ensure patient compliance
- g) Use of Botox in management of hyperactive muscle activities and parafunctional habits

COURSE OBJECTIVES

1. Case selection criteria and step by step execution for anterior immediate implant placement with immediate provisionalization
2. Indications for open and closed tray techniques in the fabrication of master casts in implant dentistry
3. Advantages and disadvantages to screw and cement retained implant prosthetics
4. Various treatment options for fabrication of mandibular over dentures using the Locator attachments
5. Clarification of implant occlusion for various fixed implant restorations
6. Adjustment and insertion protocol for parafunctional night guard appliance
7. Understanding the role of Botox for therapeutic applications in clinical dentistry

Graduated from University of Detroit Mercy for his dental program. He then completed a 1-year General Practice Residency program at the Miami Valley Hospital in Dayton Ohio. He practiced general dentistry for 13 years then return to complete his postgraduate training in the specialty of Prosthodontics at the University Of Toronto.

Ontario Academy of General Dentistry (Approval #219289)
Academy of General Dentistry Approved PACE Program Provider. FAGD/
MAGD Credit. Approval does not imply acceptance by a state or provincial
board of dentistry or AGD endorsement. 01/01/2010 - 12/31/2021
