Innovations in Laser Dentistry

Practical Indications for Use with the Most Versatile Devices

Dr. Scott Parker - Utah

Since 1998, Dr. Parker has educated thousands of clinicians across the US and internationally. Recognized by his Peers for his conservative yet Progressive approach, as well as his Ability to connect on a personal level, Dr. Parker's realistic manner of teaching has made him a highly regarded lecturing clinician and consultant. In addition to speaking and training, he has written or is listed on over 30 patents or patents-pending and has published articles in a variety of respected dental journals He is an accredited member of American Society for Dental Aesthetics and he American Academy of Cosmetic Dentistry and has a comprehensive understanding of dental lasers, aesthetics, implants, functional reconstruction and is a recognized subject matter expert in the laser treatment of airway disorders including non invasive treatments for snoring.

Dr. Ian Raskin -Toronto

is a 1984 graduate of the University of Toronto, Past President of the Canadian chapter of the Academy of Laser Dentistry and has used virtually very dental laser wavelength for both hard and soft tissue procedures. He has over 30 years of experience using lasers in daily practice for general surgeries, perio, restorative and aesthetic procedures. He maintains a private practice in North York, ON with a focus on restorative and implant dentistry. He is a Fellow in the International Congress of Oral Implantology, and has completed extensive training in surgical implantology with Dr. Frank Spear, Dr. Carl Misch, Dr. Michael Pikos and Dr. Marius Steigmann.
