Innovations in Laser Dentistry

Practical Indications for Use with the Most Versatile Devices

Dr. Ian Raskin

is a 1984 graduate of the University of Toronto, Past President of the Canadian chapter of the Academy of Laser Dentistry and has used Virtually every dental laser wavelength for both hard and soft tissue procedures. He has over 30 years of experience using lasers in daily practice for general surgeries, perio, restorative and aesthetic procedures. He maintains a private practice in North York, ON with a focus on restorative and implant dentistry. He is a Fellow in the International Congress of Oral Implantology, and has completed extensive training in surgical implantology with Dr. Frank Spear, Dr. Carl Misch, Dr. Michael Pikos and Dr. Marius Steigmann.

Gwen Smukowski RDH, BS, MBA

graduated from Marquette University in 1989 with a Bachelor of Science in Dental Hygiene and completed her Masters in Business Administration in 2012. She is a clinical hygienist at Norwood Park Periodontics in Chicago IL and a member of ADHA, the Academy of Laser Dentistry and the American Academy of Cosmetic Dentistry. She is the Founder of Continuity Consulting, an educator and consultant for an international dental awareness firm. Her focus on excellence in periodontal care has taken her worldwide as an instructor and speaker on the subjects of laser-assisted periodontal health, practice management, leadership development, integrated marketing and team based comprehensive dentistry.

*Grow practice income
\$25K/month!*

COURSE OBJECTIVES

Understand which laser wavelengths can be used and how to use them for;

- minimally invasive surgeries such as biopsies, frenctomies, gingivectomies, and perio surgery
- surgical implantology & periimplantitis treatments
- infant tongue tie release
- non-invasive snoring treatments
- facial aesthetics

Plus participants will learn how to **increase patient acceptance and grow the hygiene practice** by implementing a team based approach and;

- understanding the paradigm shifts in periodontics that have led to a medical approach to the infectious disease process and essential diagnostic testing to evaluate periodontal pathogens, genetic susceptibility, & biomarkers
- learn about ultrasonics, systemic and localized antibiotics, guided biofilm disruption, CO2 lasers & photo bio-modulation, plus
- effective case typing and treatment planning and how to bill non-surgical therapy and maximize insurance benefits.
