

1 Day Mastertrack

TORONTO APRIL 11 2025

FRIDAY

DENNIS MARANGOS, BSc, DDS, FAGD

Dr. Dennis Marangos graduated from the University of Toronto, Faculty of Dentistry in 1986. He completed a General Practice Residency at Mount Sinai Hospital in Toronto in 1987 and currently maintains a private practice in Toronto with emphasis on aesthetic, restorative dentistry and orthodontics.

He is the principal dentist at the Yorkville TMJ Centre, a practice that focuses on management of head, neck and TMJ related pain as well as obstructive sleep apnea and snoring. Dr. Marangos has lectured and presented hands-on workshops for many groups and study clubs on restorative dentistry, orthodontics, the management of TMD and craniofacial pain, direct and indirect restorative dentistry, biometrics, and occlusion.

Terms & Conditions

The Ontario Academy of General Dentistry reserves the right to cancel any mastertrack course at any time. In such cases a full refund will be given to each participant. Participants cancelling more than 90 days prior to the course will be refunded in full. Participants cancelling less than 90 days but more than 30 days prior to the course are entitled to a refund less a \$300.00 Administration fee. Participants who cancel less than 30 days prior to the course are not entitled to a refund. Costs incurred for travel and hotel accommodations remain the responsibility of each participant.

board of dentistry or AGD endorsement. 01/01/2010 - 12/31/2025

AN ENGAGING JOURNEY INTO PREDICTABLE DIRECT COMPOSITE DENTISTRY!

REGISTRATION: 8:00AM – 8:30AM | COURSE: 8:30AM – 4:00PM

PART 1: Adhesive Dentistry – The Cornerstone of Effective Direct Composite Dentistry

Step into the fascinating world of adhesive dentistry, a field that has transformed over the past 60 years! From the groundbreaking techniques of the 1950s to today's advanced bonding systems, the evolution of adhesive dentistry is a story of innovation and discovery.

In the 1950s and 60s, we witnessed the birth of etching enamel and dentin to apply tooth-colored restoratives. By the 1980s and 90s, the Total Etch Technique revolutionized our approach. Fast forward to now, and we find ourselves navigating through 8 generations of bonding technology—ranging from “total etch” to “self-etch” and “no-etch.” Are you feeling overwhelmed? Ever wondered why your results vary? What truly is the “best” bonding agent for your practice?

Dr. Dennis Marangos will demystify these concepts, guiding you through the latest advancements in adhesive dentistry. You'll explore current materials and bonding systems, weighing the pros and cons of each. Dr. Marangos will equip you with a reliable system that you can implement in your practice immediately!

PART 2: Mastering the Direct Anterior Restoration: Hands-On

Unlock the secrets of the direct anterior restoration—the cornerstone of aesthetic dentistry. Achieving beautiful outcomes in just one appointment is not only possible, but highly predictable with the right system and protocol.

You will learn to master the Class IV build-up and an introduction to the innovative anatomic anterior matrices, and discover when to layer your materials or when a single universal shade will suffice.

PART 3: Perfecting the Direct Posterior Restoration: Hands-On

The direct posterior composite restoration is one of the most common procedures in modern dentistry—but it's also one of the most technique-sensitive! Challenges such as post-operative sensitivity, poor contacts, and microleakage can impact your success.

In this engaging hands-on session, you will work with a variety of matrix systems. You'll gain practical experience with layered posterior composites as well as the bulk-filled composite system, ensuring you leave with the confidence to tackle any posterior restoration.

LEARNING OBJECTIVES:

- Master proper adhesive techniques to minimize post-operative sensitivity.
- Understand the distinctions between total etch, self-etch, and universal adhesive systems.
- Know when to use each system for optimal results.
- Achieve predictable anterior composite restorations that are both functional and aesthetically pleasing, all while eliminating post-operative sensitivity.
- Create reliable posterior contacts with great anatomy and reduced sensitivity.
- Learn the Bulk Fill Technique for efficient and effective restorations.

Don't miss this opportunity to elevate your practice! Register today and transform your approach to direct composite dentistry.

COURSE LOCATION: SHAW DENTAL LAB 105 BENTWORTH AVE UNIT 1 | NORTH YORK, ON

COURSE FEE: \$399 FOR AGD MEMBERS | \$599 FOR NON AGD MEMBERS
(7 PARTICIPATION HOURS FOR SEMINAR | CATEGORY 2 HOURS)

14 PARTICIPATION HOURS WITH COMPLETION OF ASSIGNMENT.
SUBJECT CODE 250
