INSTITUTE

Partners in Predictability: Guided Surgery and *Guided Prosthetics*™ for Immediate Full Arch Implant Restorations

A 2-Day Hands-On Program

Toronto, ON: March 31 - April 1, 2017

Dr. Natalie Wong & Mr. Daniel R. Llop, CDT

Program Topics

- Immediate loading concepts
- Implant biomechanics
- Proper diagnostic records including CBCT protocol for nSequence
- Diagnostics and merging digital information from the lab perspective
- "All-on-4" concept
- CBCT/guided surgery
- Guided Surgery/*Guided Prosthetics*™
- Hands-on step by step guided surgery protocol
- Hands-on step by step guided prosthetic protocol
- Post-operative instructions
- Transition to final prosthetics

Program Objectives

- Appreciate the protocols for a digitally planned, completely guided surgical and restorative approach for an immediate full arch implant rehabilitation
- Understand the diagnosis, treatment planning and records needed for an immediate full arch implant reconstruction case
- Outline the surgical steps including flap design, bone reduction, implant placement and suturing
- Understand the prosthetic steps including immediate prosthetic pick up, as well as, steps in creating the final full arch restoration
- Apply an appropriate post-operative and maintenance regimen for cases with a full arch immediate prosthesis
