Endodontics From A to Z: Complete, Practical, and Comprehensive 1.5-Day

Friday, March 27, 2015 – Saturday, March 28, 2015

CDE Credits: 10 (1.5-day total)
Location: Hiossen Training Centre
250 Shields Court Unit 5, Markham, ON L3R 9W7

TIME: Registration: 8:30am Course: Friday 9:00am - 5:00pm, Saturday 8:00am - 12:00pm

COURSE DESCRIPTION:
This course is tailored for general dentists with comprehensive hands-on training. The presentation will be very honest, easy to follow and engaging.

Day 1 – Lecture
- Endodontic diagnosis and treatment planning (including 3D cone beam imaging)
- Anaesthesia in endodontics, including hot teeth
- Better access preparations and locating calcified canals (including MB2)
- How to instrument better, more efficiently and separate less files
- Improved canal disinfection and one vs. two appointment root canals
- Obturating more efficiently, predictably and in 3-dimensions
- Prevention and management of endodontic procedural errors (including perforations and file fractures)
- Anaesthetics and antibiotics in endodontics
- The significance of magnification (ie microscopes) in endodontics, and how to incorporate them into your practice
- Newest endodontic materials, instruments and techniques and which might suit and improve your practice, and which are and aren’t worth investing your time and money

Day 2 - Workshop
- Participants will be trained on the latest and most efficient instrumentation and obturation systems, including calcified and curved canals
- Participants will be exposed to dental microscopes and be shown how they can help their endodontic access preps, locating and managing calcified canals

*NOTE: Students are required to bring at least three previously endo accessed teeth stored in bleach. Do not instrument any canals
- Participants are welcomed to bring radiographs of their endodontic cases for a private one-on-one review with Dr. Haas

Space is limited
