

IMPLANT FAILURES & PERI-IMPLANTITIS

SEMINAR/HANDS-ON WORKSHOP

This seminar will highlight the increasing problems facing dental clinicians in the era of implantology. Implant complications, failures, and peri-implantitis are major clinical issues impacting on patient care and treatment planning. Local and systemic etiologies are identified for peri-implantitis and selected implant failures. Clinical approaches for implant rescue continue to be evaluated and will be included in a hands-on workshop with pig jaws and models with peri-implantitis.

COURSE OUTLINE:

- Define peri-implant mucositis and peri-implantitis
- Recognize the primary etiologies of peri-implantitis
- Management of non-surgical approaches for implant rescue
- Management of surgical approaches for implant rescue
- Recognize the importance of implant maintenance
