Update in Dentistry: Implications of Dental Complications | Staying out of Trouble

PROGRAM OVERVIEW

Complications (bleeding, infection, pain etc.) associated with dental treatment are relatively common and can have devastating and sometimes all-consuming consequences for patients but equally so for practitioners. The efforts required to manage complications far outweigh those required to prevent them. Yet, even with the best practice approaches, complications can still develop and must be managed successfully and expeditiously.

This one-day symposium will focus on avoidance of complications; principally by outlining appropriate treatment planning strategies for various conditions. Given that complications will still occur from time to time, our speakers will concentrate on the diagnosis and management of a wide array of these problems. Experts in oral and maxillofacial surgery, oral and maxillofacial pathology, endodontology, prosthetics as well as experts in the routine management of medically complex patients will give insights regarding appropriate treatment planning for patients. These experts will also discuss approaches towards mitigation of problems arising should complications occur.

At the end of the symposium participants will have a better understanding of the cause of various types of complications, how to avoid them and if they do occur, how to treat them.

PROGRAM SCHEDULE

1. Brian Rittenberg - Medication Related Osteonecrosis of the Jaw (MRONJ) - An Update: “It’s in the bone”
2. Kristopher Lee - Trigeminal Nerve Injury & Management
3. Mary Ellen Cascone - Special Care For Special Patients: Caring for the Medically Compromised Patients in Your Office
4. Bobby Baig - Overview of Fixed Prosthodontic Complications: Tooth Supported Restorations
5. Lesley David - It’s Time to Minimize Implant Complications!
6. Amir Azarpazhooh - How to Avoid Mishaps in Endodontics

There will be no onsite registration and you will be turned away from the venue. There is limited attendance to the course. Your credit card will be taken and any cancellation within three weeks of the course will have a $75 charge. AGD reserves the right to cancel or alter the course. The exact location of the course will be emailed within one month of the course. This is the only form of communication for the location of the course.

Ontario AGD is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing dental education programs of this program provider are accepted by AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 06/01/2011 - 12/31/2021.
