There is limited attendance to the course. Your credit card will be taken and any cancellation within three weeks of the course will have a \$75 charge. AGD reserves the right to cancel or alter the course. The exact location of the course will be emailed within one month of the course. This is the only form of communication for the location of the course.

Pathophysiology, Pharmacotherapy and Dental Management of the Patient with Common Medical Conditions

COURSE DESCRIPTION

The course is designed to provide dental practitioners with a survey of common medical disorders that may be encountered in a dental practice. The medical problems are organized to provide a brief overview of the basic disease process, etiology, incidence, prevalence, medications and oral manifestations commonly presented by the dental patients. In particular, patients with Neurological disorders, cardiovascular disease, endocrine conditions and geriatrics will be discussed so the practitioner can provide appropriate and safe dental care.

COURSE OBJECTIVES

1. Recognize the prevalence, incidence and etiology of various common medical conditions.
2. Understand (a) the pathophysiology and (b) pharmacotherapy of these disorders and consequences to oral health.
3. Introduce the appropriate procedures in dental practice required to optimize dental care in these patients.
4. Recognize and manage medical emergencies in these patients.
